Description

In a follow-up to *if you follow a crooked river*, which explored the places that helped form him as a man, Cheslock does the same with people who have been the primary influences in his life. By the time readers finish the book, they will feel as though they knew these people, that they have come to care about them. Cincinnati poet Richard Hague says of *all the stars....*: these poems are unassuming, straightforwardly nostalgic, sentiment-filled, and chock full of the decency and worth of everyday life."
